

TeleMagic Enterprise V5

Service Pack 4

Network Installation

1. Download the V5SETUP.EXE file into a workstation that is logged in to the server and which has a drive mapping to the network share where TeleMagic is to be installed. (For example, download to C:\Temp and have a server share mapped to T.)
 2. Download the TMFORMS.APP file to the same folder.
 3. Click Start, Run, Browse. Choose C:\Temp\ V5SETUP.EXE
 4. Click OK. The TeleMagic install wizard will start.
 5. Proceed through the wizard, choosing to install the evaluation version..
 6. Tell it where TeleMagic is to be installed (Recommended: \TM5 on the T: drive).
 7. Continue until the wizard tells you it is finished.
 8. Copy (overwrite) the TMFORMS.APP file that is in the TeleMagic \programs folder on the server with the downloaded TMFORMS.APP file.
 9. On every user's workstation, click Start, Run, Browse. Navigate to \TM5\programs folder in the server share where you installed TeleMagic and select TM5.EXE. (T:\TM5\programs\TM5.exe).
 10. Click OK to start the wizard.
 11. The wizard will install a TM5node folder onto the C: drive and a desktop shortcut to start the application.
 12. The wizard will give you the opportunity to embed a username and password into the shortcut. Consider the security implications before you do this.
- All done! To start TeleMagic in future, double-click the desktop icon.
